  time, 39–41
Sensory system.
  measure of sensitivity, 131–35
  models of, 105–12
  see also Threshold theories
Sensory threshold. See Threshold
Serial position curves, 255, 502–04
  with relative scale, 504–06
Serial presentation and recall task, 501–02
  SAM and GAM components in, 506–07
Serial search:
  exhaustive, 67–70
  self-terminating, 66–67
Set, 289
  see also Selective perception
Sextant, 562
Shadowing, 278–81, 286–88, 295, 296, 532
Shape constancy, 211–12
Shape judgment task, 217
Shepard and Metzler task, 221
Shiffrin study, 548–50
Short-term memory:
  limitation of, 242–44, 342–43
  see also GAM, Immediate memory, SAM, Working memory
Short-term store
  of Broadbent's model, 261–62
Signal detection task
  a priori probability, 140
  confidence ratings in, 139
  method and data analysis for, 136–38
Signal detection theory. See Multi-state theory
Signal-to-noise ratio, 359
Sign:
  in reading, 377–79
  in speech, 461–62
Simple RT task, 44
Simulated subject, 593–96
Sine waves, 406, 407–09
Size constancy, 169–90, 209–11
Size-weight illusion, 201–05
Slits and pieces, 348
Slope, 70
SOA, 365
Soul, 10, 563
Sound:
  clicks, 273
  complex patterns of, 409–412
  description of, 405–09
  nonsense, 457–58
  perceived duration of, 440–41
  power spectra of, 409–12
  pressure, 407–08
  white noise, 412, 415
Sound spectrogram, 420–23
  of /dɪ/ and /dɑː/, 423, 470
  of /ba/, /da/, /ga/, 516
  of /iː/, /i/, and /eː/, 517, 518
Sound spectrograph, 422–23
Span of apprehension, 240
Speech, 460–75
  organs of, 413–14
  recognition, 460–75
  see also Categorical perception
Speech organs, 413–14
Speech perception, 460–75
Speech production, 413–15, 419
Speech sounds, 413–23, 458–59
  consonants, 517–18
  synthesized, 422–23
  voiced, 414–15
  voiceless, 415
  vowel, 417–18, 419
Sperling study, 241–47, 371–72, 374, 427
Split-span tasks, 262–73, 523–25
Stabilized image, 163, 164–66
Stages of mental processing, 19, 21
  see also Additive-factor method,
    Information-processing model, Subtractive method
Stars:
  and Fechner's psychophysical law, 96
Statistics, 353
  analysis of variance, 70
Sternberg task, 63–64, 73–78, 521–23, 588–73
  compared to Neisser task, 81–82
  suggested readings in, 606
Stimulus and response, 10–19
  stages between, 19–21
Stimulus confounding, 309
Stimulus intensity:
  and reaction time, 43–44, 53–57
Stimulus onset asynchrony. See SOA
Stimulus-response compatibility. See Response compatibility
Stimulus-response psychology, 28
Stop consonants, 419–20, 573
Strategies:
  control for, 218
  roop color-word effect, 297
Storage process. See Acquisition process
Structural components:
  of information-processing model, 19–21
Subject differences, 362–64, 440
Subliminal perception, 101
Subtractive method, 42–43, 57
  A, B, and C tasks, 47–48
  compared to additive-factor method, 57–61
  criticism of, 48–49
  Sternberg's modification, 49–51
  see also Reaction time
SVM (synthesized visual memory), 526–39
  independence from GAM, 538–39
  interference with, 534–35
Synthesized auditory memory. See SAM
Synthesized auditory storage. See SAM
Synthesized speech sounds, 422–23
Synthesized visual memory. See SVM
Switching time, 271

Tachistoscope, 241, 341
Tactile detection, 301–02
 "That you may see," 420–21
Theory:
  the role of in research, 24
  Theory of signal detectability. See Multistate theory
Threshold, 88
  and Fechner's psychophysical law, 93–95
  probabilistic, 106–06
  variability of, 96–97
  see also Threshold theory
Threshold theory:
Fechner's, 93–95
general two-state, 112–16
high threshold, 106–12
